

# DC 1800

## HEPA filter

Market leading filtration for this size of machine. HEPA filter to EN class H standard. 99,995% degree of separation (DOP 99,97).

## Flexible

You can easily take it in your car or put it under a workbench.

## Light

Weight only 10 kg. Very simple to carry with top mounted handle.

**A small machine for industry and smaller construction jobs.**

**Dustcontrol**

TECHNOLOGY FOR CLEAN PRODUCTION

# DC 1800

## In general

The 1800 is a compact version of the highly popular DC 2800a. A combination of the ease with which it can be handled, large suction capacity and excellent standard of filtration make this a very useful machine.

## Handling

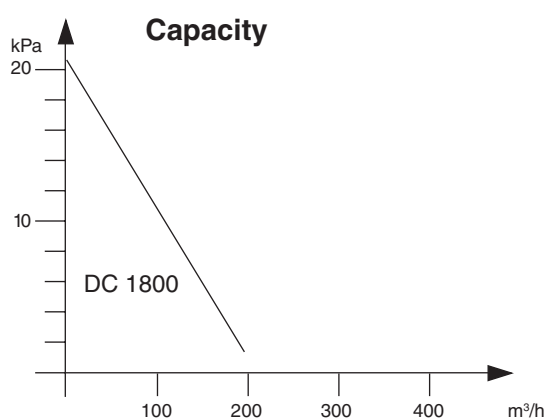

The 1800 weighs only 10 kgs and is very easy to carry around. A handle is located on top of the motor. The machine is compact, which means that it takes up very little room; e.g. in the car. The total height is under 75 cms, which makes it possible to fit under many workbenches.

## Filter

The machine is equipped with a fine filter and a HEPA filter and meets filtration class H requirements according to the European Standard. The integrated air pulse filter cleaning system is very effective and is done without mess or having to disassemble the machine.

The machine does not have a chassis and is equipped with a low rise 11 litre container mounted on four castor wheels.

The machine is delivered with common Dustcontrol original cleaning accessories.

## TECHNICAL DATA

## DC 1800

HxWxL mm	740x380x380
Weight	10 kg
Inlet	X 50 mm
Hose length	max 5 m
Flow at open outlet	max 190 m³/h
Negative pressure	21 kPa
Power consumption, 220/240 V,	1200 W
Fine filter area	1,5 m²
Degree of separation fine filter (EN 60335)	> 99,9%
Filter area HEPA filter	0,85 m²
Degree of separation HEPA filter (EN)	> 99,995%
Collection sack/container	560x700/11 l
