

Pressrelease

CNP Professional choose Dustcontrol

Integrated Food Projects Limited (IFP), that CNP Professional engaged as project managers with the aim of creating a food grade standard production facility, saw Dustcontrol's exhibition stand at the PPMA event at the NEC Birmingham in 2009. The equipment was well engineered, efficient and competitively priced. Dustcontrol stood out in terms of equipment and service. The sales engineer was very knowledgeable and quickly understood the requirements of CNP Professional.

CNP Professional Ltd is a leading manufacturer & distributor of premium quality sports supplements in the UK and worldwide
www.cnpprofessional.co.uk

In 2009 the management decided to explore and evaluate the option of manufacturing the powdered product range in house – with the aim of creating a food grade standard production facility. We engaged Integrated Food Projects Limited (IFP) as project managers, to assist and advise us on this project. The project, which involved relocation to new premises, was given the go ahead in November 2009 – at a total capital value of £1.2m – which included Dustcontrol systems. The installation team were very professional and fitted the system with no delays or incidents to a high standard. The after sales service is very good and they are always willing to assist. First products were manufactured in June 2010.
