

## Room air conditioners to suit every environment

With environmental efficiency becoming the leading factor in many decisions, it's no wonder that SANYO Air Conditioners are the natural choice.

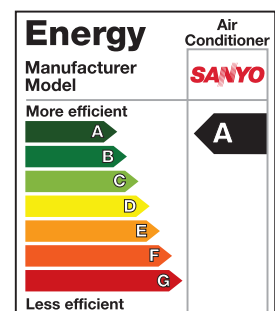

Our (Mini) Shiki Sai Kan room systems have achieved Class A efficiency thanks to their use of non-ozone depleting R410A refrigerant. Fitted with high performance odour, germ and bacteria filters, they deliver clean air, as well as cost-effective operation, with lower energy consumption and quiet operation.

With a choice of many colours, and COP ratings of up to 5,0, SANYO's (Mini) Shiki Sai Kan room air conditioners are green whatever the colour.

To find out more, please call ACB Airconditioning or visit their website.
