

AirCube 2000

A powerful air cleaner – single phase

AirCube 2000

The DC AirCube 2000 is a compact and robust design with a capacity of 1800m³/h which makes it an extremely powerful single phase air cleaner.

It has a 0,7m² pre-filter and a HEPA H13 microfilter of 10m² and a filter indication lamp that is lit when it's time to change the filter. The air exhaust is directed upwards in order to prevent dust being disturbed on the floor.

With its ergonomic design it is easy to carry and transport. It can also connect to a 10 mtr exhaust hose without a reduction in performance.

The DC AirCube 2000 can also be positioned horizontally flat on the floor with the exhaust then pointing to the side.

Technical data DC AirCube 2000

Weight (kg)	25
HxWxL	970x500x480
Air flow	1800 m ³ /h
HEPA H13 filter	10 m ²
Pre-filter	0,7 m ²

High capacity 1800 m³/h
Robust
Easy to transport
