

Growing business through innovation

CONNECTED MANUFACTURING

31 Oct & 1 Nov 2018, NEC, Birmingham

The only national Industry 4.0 exhibition and senior management conference.

Located as part of the UK's largest annual gathering of engineering & manufacturing decision makers, Connected Manufacturing provides a dedicated exhibition and senior management conference at a national level.

Building on the success of last year's 500+ conference forum attendance, 2018 will expand its reach even further to include world renowned speakers providing jargon free practical information, specifically aimed at those who drive UK manufacturing forward.

WHY CONNECTED MANUFACTURING WORKS?

Connected Manufacturing covers all technology that make up industry 4.0, allowing decision makers to implement the very latest technologies allowing UK businesses on a global scale.

WHY EXHIBIT AT CONNECTED MANUFACTURING?

- Unrivalled audience reach at the NEC:
The only national 4.0 exhibition/conference
- Will demonstrate all the technologies that represent 4.0, allowing key decision makers to make well informed business changing decisions.
- More C-suite attendees over two days than any over UK Industry 4.0 exhibition
- The conference will attract senior managers, more talks, more case studies, more leading Industry 4.0 experts.
- 2017 response has been outstanding from both exhibitors and attendees
- Benefit from the full marketing campaign, including; your very own micro-site, email exposure to over 80,000 industry professionals, a range of free marketing tools and much more!

"Connected Manufacturing 2017 was a tremendous success for BARA members for networking, meeting key buyers and specifiers from all over the UK, Connected Manufacturing also hosted a first class conference programme which was packed throughout the two days"

Mike Wilson, President, British Automation and Robot Association
