Fill-Air Cyclone® meets the most rigorous, high-volume packaging challenges without giving up valuable floor space.
**Fill-Air Cyclone® System**

The speed you need to feed your high-throughput environments

---

**Tiny footprint, enormous production**

The Fill-Air® Cyclone® inflatable packaging system produces 20 metres of inflatable void fill cushions per minute in a variety of sizes—fast enough to keep up with the most demanding packaging operations. The small footprint gives you the flexibility to use the Fill-Air Cyclone® system on demand in decentralised tabletop environments, or online for increased efficiency.

---

**Choose from eight cushion sizes**

Fill-Air Cyclone® film is available in four film widths and can be converted to two different cushion lengths, creating eight possible cushion sizes; the largest measures 350 x 200mm.

<td>300 x 200mm</td>
<td>350 x 200mm</td>
</tr>
</tbody>
</table>

---

**Ready to work right out of the box**

With the Fill-Air Cyclone® system, installation is a breeze. The simple yet sophisticated design requires minimal training. The system is shipped in a small carton, and simply needs to be plugged in and loaded with film to begin making packaging material. No shop air is required!

---

**Responsive packaging from the worldwide leader**

Sealed Air is committed to providing solutions to our customers’ environmental challenges in a reliable, cost-effective and responsible manner. Because Fill-Air® material inflates on-site, it takes up a fraction of the truck space needed to ship conventional packaging materials, greatly reducing the transportation impact.

---

**Compact design saves valuable floor space**

The Fill-Air Cyclone® has a compact footprint (less than 0.13m²) that makes it ideal for tabletop placement at a pack station. Push-button operation allows material to be created on demand. Material can also be batched into bins for use at satellite packaging stations. An auto-replenishment sensor can be implemented to maintain a consistent supply of material at all times.

---

**Specifications**

**Electrical:**

- 220 – 240 V Single Phase
- 1.0 A 50/60 Hz

**Weight (without roll):**

- 17 kg.

**Overall Size with roll (W x D x H):**

- 521mm x 432mm x 470mm
